Report Period: Oct 4 - Oct 18

Summary of Progress in this Period

- Continuing research and determining ADC and bluetooth compatibility
- Attempting first iteration of a filter
- Microphone exploration
- Added functionality of audio function to website

Pending Issues

- Needing to buy components to get a low enough filtering frequency
- Find a way to make storing audio more efficient.

Plans for Upcoming Reporting Period

- Create concrete implementation for ADC (meeting with mentor)
- Create another potential machine learning model
